

FINANCIAL CALCULATORS POWERED BY CalcXML

Calculators you can always count on

Precision-made calculators are an ideal solution to increase engagement on your website, while also enhancing your members' financial experience. The financial calculators, market-tested, and examined and verified by financial professionals for more than two decades, provide concise, current, and accurate data - while allowing you to optimize the member experience.

Financial calculators include:

- 150 + topics spanning all financial categories
- Customized branding
- Responsive design
- ADA accessibility
- Mobile readiness
- Automatic tax updates

FINANCIAL CALCULATORS POWERED BY CalcXML

Implementation

Our implementation options include a CalcXML-hosted solution, an API implementation, or a combination of both to meet a credit union's needs, as well as its capabilities. Whether you want a quick launch of the calculators, or you want to control the look and feel of the application, our options allow for a seamless integration into your website. Plus, you are able to add your personal touch through branding, customizations, and a white-label option.

Implementation Options:

- Embedded
- IFrame
- Pop-up/New tab
- API web services

Calculator Features

The financial calculators' features focus on both optimal user experience and your marketing and overall goals. Whether a member wants to know how much they can afford when buying a house, or how long it will take to save for retirement, we ensure precise answers to their questions by using easy-to-understand communications, like targeted charts and simple graphs. And if necessary, we also specialize in creating custom calculators.

Additional Features and Options:

- PDF reports
- Lead generation/Calls to Action
- Spanish/International calculators
- White-label options
- Custom calculators per client request
